

AIS from Electronic Data Collection

AIS – Automated Issuance System:

The Automated Issuance System is the electronic bridge between your existing citation management software and our AIMS Tickers. AI is loaded on one PC at your site, but handles an unlimited number of handhelds communicating via a cradle, Ethernet connection, and 802.11b or GSM/GPRS wireless networks.

AIS moves information to and from your database and the Tickers:

- Scofflaws
- Tow Lists
- Warnings
- Vehicles
- Permits
- Digital Images
- Ticket Attachments
- *Signatures*
